This sample is built live and not stored. A member's record is append-only: HaulProof's database refuses any change to it and any deletion for 7 years, each record carries the SHA-256 of the one before it for the same carrier, and GET /v1/vetting-records/{id} returns the stored JSON the hash is computed over.

Compiled from public government records as they stood at the time shown. Information to support the broker's own decision, not a guarantee. HaulProof is a product of A3E Ecosystem Inc.
